SQL Suites

BUNDLED SOLUTIONS THAT DELIVER VALUE FOR EVERY DBA

The job of the DBA involves many responsibilities. Each day comprises an unpredictable mix of activities from tuning problem queries, managing backup and defrag jobs, auditing compliance, managing user permissions, and more. To be effective and efficient, a DBA needs to utilize all the tools at their disposal while delivering value to their organizations. To support this endeavor, IDERA has assembled vital technology together to address DBAs critical needs while providing significant savings to the bottom line. Each suite contains full license to the Idera SQL software component with the first year of standard technical support included. Plus, when you buy our bundles, you can save up to 40% versus buying each product separately!

KEY BENEFITS OF BUNDLING

- Access vital technology to address key needs
- Lower SQL Server software spend
- Improve SQL Server performance
- Simplify software procurement and management
- Reduce SQL Server maintenance costs
