IDERA

Medium Enterprise / Insurance in USA

Introduction

This case study of Ameriben Solutions is based on a November 2017 survey of SQL Safe Backup customers by TechValidate, a 3rd-party research service.

> "With SQL Safe Backup, it is easier to manage and see the server backups. This is very handy for our small SQL Express farm as well as the standard SQL Servers."

> "With SQL Safe Backup, we changed from a manual process that cannot be easily automated, to an automated, repeatable, managed, scheduled process that my backup person can also use."

Challenges

The business challenge that led the profiled company to evaluate and ultimately select SQL Safe Backup:

- Were unable to manage an entire backup environment via a centralized console

Use Case

The key features and functionalities of SQL Safe Backup that the surveyed company uses: Has 25 to 49 SQL Server databases in their environment.

Results

The surveyed company achieved the following results with SQL Safe Backup:

- Team impact:
  - Are able to manage an entire backup environment with a single solution
  - Have better insight into backup processes and areas of inefficiencies
  - Have faster backup and recovery times
  - Have earlier detection and quicker resolution of backup problems
  - Can more easily predict future resource needs
  - Are able to recover a single item without restoring an entire database
- Organizational impact:
  - Gained confidence that an entire environment is adequately backed up
  - Experienced fewer and shorter end-user productivity interruptions
  - Improved business continuity via rapid recovery after outages
  - Ensured organizational compliance via policy-based management
  - Reduced their cost of managing backups and recoveries
- Reduced:
  - Backup time: 60% to 80%
  - Backup storage requirements: 60% to 80%
  - Recovery time: more than 80%
- Rates the following capabilities of SQL Safe Backup as compared to its competition:
  - User-friendliness: best in class
  - Dynamic compression: best in class
  - Advanced recovery options: best in class
  - Alerting: significantly better
  - Reporting: significantly better
  - Policy-based management: best in class
